TPgo Data

A detailed source of information around your purchasing behaviour.

Key benefits

Up to date data

Interactive

Easy to use

Instant visibility

Free

Secure and GDPR compliant

Self service

We understand that it is important to our customers to be able to access their data where and when you need it, which is why TPgo Data was created. By moving away from static spreadsheets, we can provide you with dynamic data that automatically updates everyday.

TPgo Data has been designed specifically for our customers. By listening to what you need and expect from your analytics, we have created an intuitive reporting system that gives you greater visibility of data enabling you to interact with and manipulate information at every level, transforming the way you access Management Information and Key Performance Indicators.

Report

Measure our performance with up to date KPI data at your fingertips. Need to know what your operatives are buying? TPgo Data gives you detailed invoicing reports, showing you where, when and what your operatives are purchasing.

Analyse

More than the traditional excel spreadsheet, you can drill down into reports to investigate what is really happening behind your top line numbers. Flexible filters allow you to easily focus on areas of data important to you and your business.

Export

Take what is in the portal and download on to excel to further manipulate the data and share with your team in presentations and more.

Want to know more? Find out how TPgo Data can help you today!
